Hi Connie,

If you had entered an EPDS in the system, it would have required you to enter a reviewed date, and that reviewed date would show up on the "Postnatal Form by Review Date" drop down. As it stands, it looks like you are looking at a blank form (the DOB and SSN auto populate depending on which client you have selected). Add a reviewed date, ensure the "Client left program before delivery" checkbox is checked, scroll down and click submit.

Emily

I am showing on my end that the EPDS is done (see screen shot below). I can't do anything else. The box "Client left program before delivery" is checked and I can't do anything else to the rest of the page.

Hi Connie – Right now, the system isn't showing that this client has an EPDS form entered for her at all, which is why it's not letting you discharge. Can you try re-entering her EPDS and discharging?

Hi Connie - It seems to work fine in the testing environment, so I'm not sure what the issue is in the live environment. I've submitted it to our IT department and will let you know when I hear back.

Emily

It still will not let me do a discharge on the client. I have selected the "Client Left program before delivery" on the Birthing Outcome Form and the EPDS has the box marked "client left program before delivery" also. So when I went in to discharge her this is the message I get. It is still asking me to fill out the Birthing Outcome and EPDS forms. After I select the Intake Date the message below shows up and I can't go any further.

Hi Connie - Both the Birthing Outcome form and the EPDS have an option for "Client discharged before delivery". Selecting those should allow you to then enter a discharge form.

I don't know if anyone mentioned this to you but I seem to have a problem closing a client from the ATA database. There is a client that has moved to another state-she is still pregnant-so I was getting ready to close her but the database will not let me because I don't have an Birthing Outcome and/or EPDS done on her. I will never get these forms done because she has left before she has the baby so therefore I can't close her from the system. What do you want me to do regarding this?

Thanks
